

SCI1 and SCI2 interface boards¹⁾

With the SCI1 (Serial Communication Interface 1) and SCI2 (Serial Communication Interface 2) interface boards and the SCB1 interface board, a serial I/O system can be created with fiber-optic cables, thus enabling considerable additions to the binary and analog inputs and outputs.

In addition, the fiber-optic cables safely disconnect the drive units in accordance with VDE 0100 and 0160 (PELV function, e.g. for NAMUR).

| Board/ Conductor | Supplied loose Order No. |
|---------------------------------|--------------------------------------|
| SCI1 | Interface board |
| incl. 10 m fiber-optic cable | 6SE7090-0XX84-3EA0 |
| SCI2 | Interface board |
| incl. 10 m fiber-optic cable | 6SE7090-0XX84-3EF0 |
| LWL | Plastic fiber optic cable 5 m |
| Use extra package for SLB board | 6SY7000-0AD15 |

¹⁾ Attention!
Only for compact and chassis units.
